RML Example 41: Colors

RML (Report Markup Language) is ReportLab's own language for specifying the appearance of a printed page, which is converted into PDF by the utility rml2pdf.

These RML samples showcase techniques and features for generating various types of ouput and are distributed within our commercial package as test cases. Each should be self explanatory and stand alone.

This document briefly shows a few of the ways of declaring colors in RML.
This text should be red, declared with <font color="red">
This text should be green, declared with <font color="#00ff00">
This text should be blue, declared with <font color="(0.0,0.0,1.0)">
